## DETAILED ACTION

### *Response to Amendment*

Applicant's arguments, see Remarks, filed November 7, 2006, with respect to the Non-Final Office Action mailed May 26, 2006 have been fully considered. Since the following rejection was not made on the first Non-Final Office Action, this Office Action is being made Non-Final. The cancellation of claims 1-10, 12 and 14-16 has overcome all objections and rejections from the previous Office Action. Claims 11 and 13 are pending.

### *Double Patenting*

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 11 and 13 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-26 of copending Application No. 10485747. Although the conflicting claims are not identical, they are not patentably distinct from each other because one of the species named in claim 11, ((R)-1-phenyl-ethyl)-[6- (4-piperazin-1-ylmethyl-phenyl)-7H-pyrrolo[2,3-d]pyrimidin-4-yl]-amine, is a homolog of a specie covered by the genus of claim 1 in 10485747, (1-phenyl-ethyl)-[6- (4-(4-methyl)piperazin-1-ylmethyl-phenyl)-7H-pyrrolo[2,3-d]pyrimidin-4-yl]-amine. The only difference between these two compounds is the methyl substituent on the nitrogen of the piperaziny ring at the 4 position (the underlined portion of the name above).

Since a methyl group is considered a homolog of hydrogen these compounds are considered equivalent. The MPEP 2144.09 states, "Compounds which are... homologs (compounds differing regularly by the successive addition of the same chemical group, e.g., by -CH<sub>2</sub>- groups) are generally of sufficiently close structural similarity that there is a presumed

Art Unit: 1624

expectation that such compounds possess similar properties. *In re Wilder*, 563 F.2d 457, 195 USPQ 426 (CCPA 1977).

A species in a later application can be rejected for Obviousness-type double patenting over a genus even if the genus does not render that species obvious. See *Eli Lilly & Co v. Barr Laboratories, Inc*, 55 USPQ2d 1609, 1618.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
